

Concept Document: Drink!

Application Name

Drink!

What is this app?

Drink! is basically a hydration wingman that looks out for your physical and mental health. Most people are constantly on the go and forget to actually take care of themselves. This app fixes that by making sure you're drinking enough water while forcing you to take a quick breather so you don't burn out.

What's it actually doing?

Set Your Goal: You decide how much water you want to crush every day.

Daily Pings: The system has automated reminders so it'll hit you up when it's time to hydrate.

Quick Log: Just jump in the app and punch in how many ounces you just drank.

Mandatory Zen: Every single time you log water, a 1-minute breathing timer starts automatically. It's all about taking that minute to just focus on your breath.

Tracking Your Wins: The app keeps a log of your progress so you can see if you're actually staying consistent.

The Weekly Recap: At the end of the week, it shows you a summary of how you did.

Who is it for?

Honestly, it's for anyone and everyone. As humans, we're all constantly moving, and we forget that we need water and a second to breathe to actually function right. There's tons of science showing that staying hydrated and being mindful actually makes a difference.

How do you use it?

Daily Grind: You use it throughout the day whenever a reminder pops up or you grab a drink.

Mindful Breaks: Instead of just chugging water and rushing off, you use that one-minute timer to actually reset.

Check the Stats: You look at your progress during the day to see how close you are to your goal, and check the weekly summary to see if you're vibing or failing.

Example Walkthrough

Start of the day: You open the app and set a goal to hit 90 oz of water.

The Reminder: You're in the middle of something when the app pings you: "Time to Drink!"

The Log: You grab your bottle, drink 15 oz, and log it.

The Reset: The app immediately starts a 1:00 countdown that says "Time to Breathe..." so you take a minute to chill.

The Goal: Once you finally hit that 120 oz mark, the app gives you a shoutout: "Daily goal reached! Great job staying consistent."

The Recap: On Sunday night, you check your Weekly Summary to see your stats for the last 7 days.
